## Math Common Core Learning Standards

## Counting and Cardinality

## PK.CC

Know number names and the coun
sequence.

1. Count to 20 .
2. Represent a number of objects with a written numeral $0-5$ (with 0 representing a count of no objects).
ount to tell the number of objects.
3. Understand the relationship between numbers and quantities to 10 ; connect counting to cardinality
When counting objects, say the number names in the standard order pairing each object with one and on one number name and each number
denly one object.
Understand that the last number name said tells the number of objects counted. The number of objects is the same regardless of their arrangemen counted.
c. Understand that each successive number name refers to a quantity that is one larger
4. Count to answer "how many?" questions about as many as 10 things arranged in a line, a rectangular array, or a circle, or as many as
5 things in a scattered configuration; given a number from 1-10, count out that many objects.
5. Identify whether the number of objects in one group is more, less, greater than, fewer andor equal to the number of objects in counting strategies 1 ( 1 up to 5 obiects)
6. Identify "first" and "last" related to order or position.

## Operations \& Algebraic Thinking PK.OA <br> Understand addition as adding to, and understand subtraction as taking from.

1. Demonstrate an understanding of addition and subtraction by using object ingers, and respolite we have 3 apples and
situat add two more, how many apples do we have all together?)
Understand simple patterns.
2. Duplicate and extend (eg., What comes next?) simple patterns using concrete objects.

## Measurement \& Data

 PK.MDDescribe and compare measurable attributes.

1. Identify measurable attributes of objects such as length, and weight. Describe them using correct vocabulary (e.g.,
small, big, short, tall, empty, full, heavy, and light).
Sort objects and count the number of objects in each category
2. Sort objects into categories; count the numbers of objects in each category. 1 (limit category counts to be less than or equal to 10 )

## Geometry

 PK.GIdentify and describe shapes (squares, circles, triangles, rectangles).

1. Describe objects in the environment using names of shapes, and describe the relative positions of these objects using terms such as top, bottom, up, down, in front of, behind, over, under, and next
2. Correctly name shapes regardless of size

Analyze, compare, and sort objects.
3. Analyze, compare, and sort two- and different sizes, using informal language to describe their similarities, differences, and other attributes (e.g, color, size, shape).
4. Create and build shapes from components (e.g., sticks and clay balls).
